

In the Drawings:

Please replace drawing sheet 2 illustrating FIG. 2 with the enclosed "Replacement Sheet."

REMARKS

The Applicant requests that the drawing sheet illustrating FIG. 2 be replaced with the enclosed "Replacement Sheet." The heading for FIG. 2 as originally filed contained a typographical error. The heading "1510 Degrees Fahrenheit Hot Breaking Strength" should be corrected to state "**1510 Degrees Celsius Hot Breaking Strength**" This correction has been made in the "Replacement Sheet."

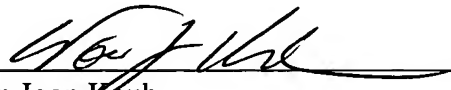

This amendment is fully supported by the original disclosure. For example, on page 4 of the Specification in the BRIEF DESCRIPTION OF THE DRAWINGS, FIG. 2 is referred to as "a graph comparing the 1510 degrees Celsius hot breaking strength of" Furthermore, the discussions in the Specification, especially that of EXAMPLE 1 on pages 12 and 13 of the Specification, clearly show that the correct heading for FIG. 2 should be "1510 Degrees Celsius Hot Breaking Strength." Thus, no new matter is being added by the requested amendment to the FIG. 2.

The foregoing amendment does not raise any issues of patentability or add new matter. Entry of the amendment to the drawings is respectfully requested.

Respectfully submitted,

Date:

May 22, 2006
